IDORs Director’s Welcome

Welcome to the 3rd and 4th year elective/elective Skin & Bones. We hope that these four weeks will be educational and rewarding. This course will provide you with a foundation of knowledge of some of the most common disorders seen by physicians serving in primary care roles. Through clinical exposure and a series of interactive, hands on workshops you will have the opportunity to develop skills in the evaluation and management of patients with musculoskeletal, rheumatologic and dermatologic diseases. These conditions have a huge impact on society.

In the U.S., one in every three Americans is treated for chronic musculoskeletal impairment or injury. In addition, a study in 2005 revealed that at any given time, one in every three people in the U.S. suffers from a skin disease.

You will receive hands-on instruction in various techniques used in these specialties including joint aspiration and injection, skin biopsy and suturing techniques, and the full musculoskeletal examination. You will be expected to become proficient in both musculoskeletal and dermatologic examinations and recognition of various disorders. This elective will give you the opportunity to see initial diagnoses of both acute and chronic conditions, as well as follow-up care.

The strength of this elective, in addition to the outstanding and innovative curriculum, is our dedicated, enthusiastic faculty. Immerse yourself into our world for the next month. Get set for an awesome experience!

Sincerely,

Joanne Valeriano-Marcet, MD
Director, Skin & Bones
Professor, Department of Medicine
Division of Rheumatology, MDC 81

Course Goals

At the successful completion of this course students will be able to:

1. Perform an appropriate history and physical examination on patients with common systemic rheumatologic disease, dermatologic, orthopedic and other musculoskeletal conditions.
2. Recognize the clinical, laboratory, and radiographic features of the more common rheumatologic, dermatologic, orthopedic and musculoskeletal diseases.
3. Understand the pathophysiology of the common rheumatologic, dermatologic, orthopedic, and musculoskeletal diagnoses.
4. Construct an appropriate differential diagnosis when evaluating patients with systemic rheumatic disease, dermatologic, orthopedic, and other musculoskeletal conditions.
5. Apply the skills and medical knowledge learned during the didactic sessions to evaluate patients in rheumatology, dermatology, orthopedics, and sports medicine clinics and design an appropriate differential diagnosis, and diagnostic and therapeutic plans for the more common conditions.
6. Develop skills of professionalism, interpersonal communication, systems based practice, and practice based improvement in the clinical setting.
7. Competently describe the morphology of all skin lesions and dermatologic conditions using accurate and pertinent dermatologic terms.
8. Learn to recognize the differences between normal and pathological findings on radiographs, MRI and CT examinations of joints, bones, spine, and musculoskeletal structures.
9. Have an understanding of the indications for and limitations of specific musculoskeletal radiology procedures including radiographs, radionuclide bone scans, arthrograms, CT, and MRI scans in musculoskeletal imaging.
10. Learn to recognize basic anatomic structures as they appear on imaging studies in the normal patient and in common disease states.
11. Be able to identify the appropriate imaging modality to evaluate common musculoskeletal complaints.
12. Describe the relevant anatomy, list indications and contraindications to joint injection/aspiration.
13. Demonstrate proper joint and soft tissue injection techniques.
14. Identify the indications for performing a shave biopsy versus a saucerization procedure.
15. Demonstrate competence in performing and suturing a punch biopsy, and an elliptical excision.
16. Recognize when a patient’s clinical presentation or course warrants referral for further rheumatologic/orthopedic or dermatologic evaluation and treatment.
17. Develop the ability to process case-based information and interpret and apply the information in the context of signs and symptoms manifested by patients with musculoskeletal disorders.
18. Understand the role of PT, OT and athletic trainers in the management of patients with MSK disorders.
19. Gain an understanding of the role of the radiologist as a diagnostic consultant by understanding the radiographic signs and images of medical imaging.
Course Logistics

Clinical Experience
The Skin & Bones elective is four weeks in duration. You will rotate through outpatient dermatology, rheumatology and orthopedic sites both at USF and off campus, and the duration of each experience is as follows. See individual rotation schedules for your individual preceptors and locations.

1.3 week dermatology, 1.3 weeks rheumatology, 1.3 weeks MSK

Clinical sites
(Detailed directions on Canvas):

- University of South Florida Medical Clinic North
- University of South Florida Medical Clinic South
- James A. Haley VA
- Moffitt Cancer Center
- Tampa General Hospital Health Park Specialty Clinic

Access to patient records at JAHVA is mandatory for a successful IDORs rotation. If you are not able to obtain access prior to the start of your rotation, you may need to re-schedule once your access is complete.
Didactic Sessions Format

Orientation

Dr. Valeriano will hold an orientation on the **first** Monday morning of each rotation. After orientation, you will meet with Dr. Jamie Cooper in the Office of Educational Affairs, MDC 1120, to check out course materials and clarify any remaining questions. Finally, you will report to your first scheduled rotation.

Lectures

All didactic lectures will be posted in Canvas which you may access at [https://my.usf.edu](https://my.usf.edu) using your NetID and password.

Didactics Schedule

See Canvas for the current schedule.

**Online Didactics**

- **Rheumatology**: All Rheumatology Online Lectures are mandatory and will be available on Canvas.
- **Arthur**: An Interactive web based program to help facilitate learning of differential diagnosis based on presentation of various patterns of joint involvement.
- **Orthopedics**: No specific online didactics
- **Dermatology**: All Dermatology Online Lectures are mandatory and will be available on Canvas.

Textbooks and Other Course Materials

Required- Textbooks will be loaned to students for the duration of the period. Students are to return the texts to Ms. Cooper not later than Friday of Week 4. Students will not be issued a grade until all textbooks are returned.

**Rheumatology Text**
See below for required readings
This text can be accessed through the Shimberg Library

**Dermatology Text**
See below for required readings

**Musculoskeletal Text**
Skinner HB, Fitzpatrick M. *Current Essentials: Orthopedics*, McGraw-Hill Medical
The text is available in an online version through the Shimberg Health Sciences Library website. To access the text:

1. Go to the Shimberg Health Sciences Library website.
2. Select the Library Catalog link.
3. Type or paste “Current Essentials: Orthopedics” into the search window. Click ‘Search’.
4. Select the link: Click For Online Full Text
5. The text will appear. It is organized by chapters.

Assessments

Clinical Evaluation
Students will be evaluated by their preceptors throughout the course of the rotation based on their medical knowledge, clinical skills (including history taking, physical examination, and verbal presentations), problem-solving skills and clinical judgment (including the ability to form a differential diagnosis, use laboratory and imaging results, plan treatment and follow-up, and complete progress notes), professional attributes (reliability, motivation, responsibility, use of medical literature and other resources, and openness to instruction and feedback), and interpersonal relationships (with patients, colleagues, staff, and preceptors).

Final Preceptor Evaluation
Preceptors will provide a final summative evaluation for the students. Each student will have 3 summative evaluations (one from each of the specialty areas). Evaluations are being done through E*Value. Faculty preceptors who have worked with the student for 4 or more half day sessions will be asked to fill out evaluations.

Coursework Evaluation

Case Presentation (10 minutes)
Students will prepare a 7 minute presentation which incorporates an appropriate case seen during the rotation clinical experience. The case can be orthopedic, rheumatologic, or dermatologic, or perhaps cross multiple disciplines. The areas of discipline will be assigned to the students at the start of the rotation. There will be 3 minutes for feedback. The grading rubric, specific instructions, and case presentation template are available on canvas.

Suturing Workshop
Students must demonstrate competencies in the suturing workshop including professionalism, preparedness, skill, and participation.

MSK exam workshop
Students must demonstrate competencies in the MSK exam workshop including professionalism, preparedness, skill, and participation.
Joint Injection Workshop
Students must demonstrate competencies in the joint injection workshop including professionalism, preparedness, skill, and participation.

Grading
Final grades will be submitted to the registrar’s office within four weeks of the completion of the rotation. Students that have not submitted the required assignments (including remediation assignments) by the deadline will receive an ‘I’. The components of the elective grade are listed below. **Professionalism will be evaluated in every activity throughout this elective.**

<table>
<thead>
<tr>
<th>COMPONENT</th>
<th>PERCENTAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preceptor Evaluations (1 each derm, rheum, ortho preceptor)</td>
<td>60%</td>
</tr>
<tr>
<td>Case Presentation</td>
<td>30%</td>
</tr>
<tr>
<td>Professionalism (to include timely completion of ungraded assignments, participation in workshops, and clinical responsibilities)</td>
<td>10%</td>
</tr>
</tbody>
</table>

Elective Grade Determination

Students must successfully complete each component of the course in order to receive a passing grade. If a student is found to be deficient in any one component of the elective/elective, he or she may receive an “incomplete” or “failure” and be required to remediate.

Elective Remediation

It is the expectation that all students attend all required activities within this course. When that is not possible the following remediation plans will be applied:

**Missed Clinics**
Students who miss clinic may be required to make up each day or half day missed, depending on the nature of the absence.
Case presentations
The remediation for this activity would first be to reschedule the presentation. If this is not possible due to time constraints, the student may prepare a PowerPoint presentation for review by the course director, and or co-directors.

Joint Injection Workshop
Review the Joint Injection Articulate Presentation on canvas

Suturing Workshop
Review the online videos on excisions, and suturing

MSK exam Workshop
Review the online videos on canvas

Please remember:
Remediation for students who fail to complete any course component is at the discretion of the Director.

Remediation for students exhibiting unprofessional behavior is at the discretion of the Director.

Students who need to remediate any portion of the elective due to an unexcused absence or a non-passing score on a course requirement will receive a maximum of “P” as their final grade.

All remediation needs to be completed within 30 days of completing the course in order to be eligible to receive an Honors as a final grade.

Grade Appeal
A student may appeal a Elective grade if the student has evidence that the grade was assigned in an erroneous manner. This is not a process for appeal of established Elective grading policies. Grade appeals must be submitted in writing or via email no later than three weeks after grades are posted in the registrar’s office. Exceptions to this policy can only be granted by the Associate Dean of Medical Education.

Course Evaluation
You must complete a course evaluation through eValue at the end of this elective. Course evaluations are due no later than 10 days following the end of the elective. Students failing to comply with this requirement will be reported to the Associate Dean of Student Affairs.
Academic Honesty Guidelines

Students attending the USF Morsani College of Medicine are awarded academic degrees in recognition of successful completion of coursework in the study of medicine. Each individual is expected to earn his or her degree on the basis of personal effort. Consequently, any form of cheating on examinations or plagiarism on assigned papers constitutes unacceptable deceit and dishonesty. Disruption of the classroom or teaching environment is also unacceptable. Unprofessional behaviors cannot be tolerated in the university community and will be punishable, according to the seriousness of the offense, in conformity with established rules and procedures.

All students are required to abide by the USF Academic Dishonesty and Disruption of Academic Process Guidelines that have been accepted by the university and are displayed in detail in the USF Student Handbook.
   a. Consequences Punishment for the violation of any of the academic honesty guidelines will depend on the seriousness of the disruption and will range from a private verbal reprimand to dismissal from the Morsani College of Medicine.
   b. Appeal Students have the right to appeal disciplinary actions to the appropriate committee through the Morsani College of Medicine Office of Student Affairs. Such appeals must be submitted in writing within ten (10) business days of notification of the decision.
   c. Requirement to Report Criminal Incident Students are required to report any interaction with the police resulting in an arrest or that results in being brought before the criminal justice system within fifteen (15) days of the incident. This requirement is independent of whether or not there is a conviction involved. Failure to report any incident will result in action by the APRC for unprofessional behavior. APRC action may result in disciplinary action up to and including dismissal from the M.D. Program.

As part of the MCOM Professionalism Initiative, all students of the Morsani College of Medicine are asked to abide by rigorous standards of academic honesty. Common violations of this include but are not be limited to:
   • lying
   • cheating
   • stealing
   • plagiarizing the work of others (this includes copying and pasting from internet resources without attribution)
   • causing purposeful or neglectful damage to property
   • impeding the learning process of a colleague
   • jeopardizing patient care in any way
   • failing to report others’ violations

USF Student handbook: http://regulationspolicies.usf.edu/regulations/pdfs/regulation-usf3.027.pdf
**Professionalism**
As a medical student at USF, you are responsible for adhering to the policies set forth in the College of Medicine M.D. Program Student handbook. You can access a copy of the handbook on the web site for the College of Medicine Office of Student Affairs located at [http://hsc.usf.edu/medicine/studentaffairs/](http://hsc.usf.edu/medicine/studentaffairs/). Selected information from the handbook is highlighted below, some of which is specific only to this elective.
The following are behavioral descriptors which will be used in IDORs to evaluate professionalism:

### MCOM Professionalism Anchors

<table>
<thead>
<tr>
<th>Value Anchor</th>
<th>Behavior</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Responsibility and Accountability</strong></td>
<td>Comes on time and is prepared</td>
<td></td>
</tr>
<tr>
<td>Informs others that he/she will be unable to attend</td>
<td>Informs faculty of intended absence from a mandatory meeting/class or clinical assignment well in advance so that consequences of absence can be addressed. Emergency absences are reported the same day</td>
<td></td>
</tr>
<tr>
<td>Completes assignments, documentation and responsibilities on time</td>
<td>Submits all assignments when due. Completes charting on patients in a timely manner</td>
<td></td>
</tr>
<tr>
<td>Complies with rules/procedures</td>
<td>Follows directions, rules and procedures; asks for clarification when needed</td>
<td></td>
</tr>
<tr>
<td>Shares workload appropriately and takes on additional responsibilities when appropriate to help the team</td>
<td>Does equal share of work in a group project. Accepts or volunteers for reasonable share of absent member’s duties/work when a team/group member is absent</td>
<td></td>
</tr>
<tr>
<td>Responds to communications in a timely manner</td>
<td>Answers emails, pages, and returns phone calls promptly</td>
<td></td>
</tr>
<tr>
<td>Acknowledges and accepts consequences of action</td>
<td>Acknowledges mistakes and accepts correction or action taken to remediate</td>
<td></td>
</tr>

How to Survive this Elective

Getting Help
Any student having academic or personal problems during the rotation is encouraged to contact the Director as soon as possible. In this way, we can provide you appropriate counseling during the rotation. If there are academic concerns regarding your rotation, we can make the appropriate suggestions. Alternatively, if there are other problems we can place you in contact with the appropriate services available to our medical students.

It is the responsibility of the student to advise the Director if he or she requires special accommodations.

Attendance Policy
During the clinical years, the student’s responsibilities lie within the individual elective. Attendance within Skin & Bones is a demonstration of attitude and professional behavior. This behavior impacts all members of the healthcare team including fellow students and patients. Any absence from the elective may have a direct impact on student performance, the broad-spectrum clinical experience, and evaluation of professionalism, overall grade and the successful completion of the elective.

Remediation in the form of additional clinical sessions, case studies, written material or oral presentations may be required for students with ANY absences from the elective.

Students are expected to attend all scheduled elective didactic conferences, lectures, workshops and scheduled clinics. These are mandatory components in the Skin & Bones Elective. Recognizing that situations may occasionally arise that require students to miss time from their lectures/clinical responsibilities, the procedures presented below will be followed when an unplanned absence is necessary:

Emergencies: for personal illness, family illness, etc.

The student will contact the direct supervising preceptor and resident/intern/rotation or section head as well as the Director in charge to report his/her absenteeism on the first day of being absent. He/she should indicate the nature of the unexpected illness or emergency. The Office of Student Affairs (OSA) must be notified of all absences by telephone (813-974-2068) or via e-mail at (kzwygart@health.usf.edu). It will be the prerogative of the Director, following consultation with the student, to excuse the absence or request additional information about the absence. This may include requesting a physician’s note or an explanation of the absence in detail. The student absenteeism form using the link provided here, will be completed by the student, then forwarded to Student Affairs and copied to the Director AND coordinator:

In order to be excused from a mandatory elective event, the student must first contact the Director, Dr. Valeriano (jvaleria@health.usf.edu), directly, then send a copy of the request to the Office of Student Affairs and the coordinator, Dr. Jamie Cooper (jcooper8@health.usf.edu). The Director will make the determination to grant or deny a request, as well as what, if any, remediation will be required.
At the full discretion of the Director, excused absences may require remediation of missed elective work, additional days and/or additional material and may proportionally affect the final grade of the elective.

**Excused absence remediation for Biopsy/Suturing Workshop**

If you have an excused absence for this workshop, you will need to:
- View the "Skin Biopsy Technique" PowerPoint
- Print the remediation assessment
- Take the remediation assessment to a dermatology preceptor you are working with to be signed off
- Submit the form to Ms. Cooper either in person, or scan and send to jcooper8@health.usf.edu.

**Excused Absence Remediation for Joint Injection Workshop**

If you have an excused absence for this workshop, you will need to:
- View the Articulate "Joint Injection" Presentation
- Print the remediation assessment
- Take the remediation assessment to a rheumatology or orthopedic preceptor you are working with to be signed off
- Submit the form to Ms. Cooper either in person, or scan and send to jcooper8@health.usf.edu.

**Excused Absence Remediation for MSK Exam Workshop**

If you have an excused absence for this workshop, you will need to:
- Print the remediation assessment
- Take the remediation assessment to an orthopedic preceptor you are working with to be signed off
- Submit the form to Ms. Cooper either in person, or scan and send to jcooper8@health.usf.edu.

**Scheduled Time Off: for interviews, out of town meetings, etc.**

The student will submit a written request to the Director Dr. Valeriano (jvaleria@health.usf.edu) for permission to miss any clinic or ward experience, scheduled exams, elective projects, or mandatory sessions for interviews or out of town meetings. [http://hsc.usf.edu/medicine/studentaffairs/Absence+Forms.htm](http://hsc.usf.edu/medicine/studentaffairs/Absence+Forms.htm)

A copy of the written request must be sent to the Office of Student Affairs and the coordinator, Ms. Jamie Cooper (jcooper8@health.usf.edu). The request should be submitted as soon as the student knows of the scheduled event, PRIOR to the start of the elective. Last minute requests (received after the start of the elective) will require supporting documentation. **The decision to grant or deny the request and determine subsequent action will be at the full discretion of the Director. As such, any excused absences may require remediation of missed elective work, additional days and/or additional material and may proportionally affect the final grade.**
Consideration will be given for activities such as elected student representation to various committees and/or organizations. The Director will respond to the student's request in writing, with a copy to the Office of Student Affairs. The student must provide any supporting documentation requested to the Office of Student Affairs addressing absenteeism. **Students who miss scheduled hours are expected to acquire the same level of competency as other students involved in the elective. Lectures, reading assignments and work load will not be re-created or offset to accommodate any absences.**

Opportunities for remediation of missed clinical time, mandatory elective components and/or additional material (if deemed necessary by the individual Director) will be scheduled so as to not impact the clinical experience of the other students in the elective, or detract from the required components of the current elective or other elective in which they are enrolled. Written permission from the current Director is required for absences for any instances of remediation.

In the student’s elective year (4th Year), it is recommended that no time is used from a required elective to fulfill any missing components from another required elective unless the student receives permission in writing from the affected Director and it is copied to the Associate Dean for Student Affairs, the Associate Dean for Undergraduate Medical Education and the Vice Dean for Educational Affairs.

Excused absences may proportionally affect final grade and/or may require remediation of missing course work, additional days and/or additional material at the discretion of the Director.

Students are expected to fulfill all time commitments for the elective. All missed time must be made up. The appropriate timing for the remediation will be subject to the Director’s discretion and should be fulfilled within a 2 month period.

**Mandatory components from all required electives must be completed prior to graduation.**

This elective (as with all electives within the college) cannot grant permission for anticipated missed time in other electives (this includes periods around holidays).

**Medical Student Hours in Clinical Years**

See Student Handbook for details.

**Holidays and Religious Observations**

**Students are expected to notify their Directors/coordinators if they intend to be absent for an announced examination, in accordance with this policy, prior to the scheduled religious holiday.**

See Student Handbook for details.
